6) An estimate for a little over Rs. 12 lacs has also been sanctioned recently in respect of congested localities like Chickpet, Balepet, Avenue Road etc. Work is expected to be executed in the course of this and the next year. The idea is to cover as many portions of the city — particularly the more thickly populated ones — as possible in the next few years and to complete the work in about 10 years, subject to funds becoming available.

To,

The Chairman, C.W.T.B, Bangalore

The Commr, C.C.B, High Ground

Sir,

I am directed to state that in its report on the future development of Bangalore, the Bangalore Development Committee recommends that action has to be taken to replace overhead electric and telephone lines by underground cables in congested streets of Bangalore.

An estimate for Rs 17 lakhs for replacing overhead wires by underground cables in the Railway station area was sanctioned some time back and it is reported that the work is almost nearing completion. Another estimate for a ~~about~~ little over Rs 12 lakhs has also been sanctioned recently to provide underground cables in the congested areas like Chickpet, Balepet, Avenue Road etc. This work is expected to be executed in the course of ~~this year~~ and the next years. The idea is to cover as many portions of the city as possible, particularly the more thickly populated areas - ~~as possible~~ within a next few years and to complete the work in about 10 years, subject to funds becoming available.

Yours faithfully

Asstt Secy
